Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is responsive to the CPA filed on 4/29/2002.

This action is made Non-Final.

2. In the amendment claims 1, 3-6, 8-11, and 13-27 are pending in the case. Claims 1, 6, 11, 19, 22, and 25 are independent claims.
3. The rejections of claims 1, 3-6, 8-11, and 13-28 under 35 U.S.C. 103(a) as being unpatentable over Angiulo, in view of Stone et al, hereinafter Stone (Pat. # 6,101,510, 8/8/00, filed on 1/29/97) have been withdrawn as necessitated by the amendment.

Drawings

4. This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Claim Objections

5. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 28 been renumbered as claim 27.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1, 4, 6, 9, 11, 14, 16-17, 19-20, 22-23, and 25-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Angiulo (Pat. # 6,275,829, 8/14/01, filed on 11/25/97), in view of Cragun et al, hereinafter Cragun (Pat. # 6,324,553, 11/2701, filed on 11/26/97).

Regarding independent claim 1, Angiulo discloses a method for controlling the display of an HTML document (having text, and image(s)) by the selection of thumbnail(s) representation of the image(s) in order to display the image in a second HTML document (col.12, lines 20-67, and fig. 6-7). Angiulo fails to explicitly disclose: *halting displaying of said image file after halting displaying said image*. However, Cragun teaches the selective halting of images in HTML pages as desired by a user (col. 2, lines 1-37, fig.14A-B). It would have been obvious to a person of ordinary skill in the art at the time of the invention to have combined the teachings of Angiulo and, Cragun, because Cragun teaches above the managing the display of images.

Claim 4 is directed towards a method for implementing the steps found in claim 1, and therefore is similarly rejected.

Claim 6 is directed towards an apparatus for controlling, and implementing the steps found in claim 1, and is similarly rejected.

Claim 9 is directed towards an apparatus for implementing the steps found in claim 1, and therefore is similarly rejected.

Claims 11, and 14 are directed towards a computer program product having computer program code for storing the steps found in claim 1, and therefore are similarly rejected.

Claims 16-17 are directed towards a method for implementing the steps found in claim 1, and therefore are similarly rejected.

Claims 19-20 are directed towards a computer program product having computer program code for storing the steps found in claim 1, and therefore are similarly rejected.

Claims 22-23 are directed towards an apparatus for implementing the steps found in claim 1, and therefore are similarly rejected.

Claims 25-26 are directed towards an apparatus for implementing the steps found in claim 1, and therefore are similarly rejected.

8. Claims 3, 5, 8, 10, 13, 15, 18, 21, 24, and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Angiulo, in view of Cragun, and further in view of Stone et al, hereinafter Stone (Pat. # 6,101,510, 8/8/00, filed on 1/29/97).

Regarding claim 3, which depends on claim 1, Angiulo discloses a method for controlling the display of an HTML document (having text, and image(s)) by the selection of thumbnail(s) representation of the image(s) in order to display the image in a second HTML document (col.12, lines 20-67, and fig. 6-7). Angiulo fails to explicitly disclose: *resuming displaying said image file after halting displaying said image file*. However, Stone teaches resuming the display of HTML pages by specifying the extent of the web page to be refreshed or reloaded (col. 6, lines 35-44). It would have been obvious to a person of ordinary skill in the art at the time of the

invention to have combined the teachings of Angiulo and, Cragun, because Stone teaches above the refreshing of the web page portion download.

Claim 5 is directed towards a method for implementing the steps found in claim 3, and therefore is similarly rejected.

Claims 8, and 10 are directed towards an apparatus for implementing the steps found in claim 3, and therefore are similarly rejected.

Claims 13, and 15 are directed towards a computer program product having computer program code for storing the steps found in claim 3, and therefore are similarly rejected.

Claim 18 is directed towards a method for implementing the steps found in claim 3, and therefore is similarly rejected.

Claim 21 is directed towards a computer program product having computer program code for storing the steps found in claim 3, and therefore is similarly rejected.

Claim 24 is directed towards an apparatus for implementing the steps found in claim 3, and therefore is similarly rejected.

Claim 27 is directed towards an apparatus for implementing the steps found in claim 3, and therefore is similarly rejected.

Response to Arguments

9. Applicant's arguments with respect to claims 1, 3-6, 8-11, and 13-27 have been considered but are moot in view of the new ground(s) of rejection.

Regarding claims 1-27, the Applicant argues that Stone fails to teach, show or suggest the display of text, image, and the halting of the image (p.10,L.29-31). The Applicant is directed towards the rejection of this newly added limitation in view of the newly found prior art.

Conclusion

I. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. **Using Netscape, Ernst, Que, 1995, pp.50-51.**
